Professional Summary

Full-stack developer experienced in MERN and MEAN stack development, with production experience building scalable backend systems and APIs. Skilled in Node.js, Express.js, MongoDB, React, and Angular, with expertise in performance optimization, RBAC implementation, and RESTful API development.

Professional Experience

InnCircles

July 2025 – Present

Software Developer Intern

Onsite

- Engineered production-level backend systems using MEAN and MERN stacks, designing database models and implementing complex workflows for an enterprise construction management platform serving construction and real estate clients.
- Optimized API performance by developing efficient Excel data processing pipelines, reducing response times from approximately 20 seconds to 5–6 seconds and improving throughput by 70–75%.
- Authored unit test cases using JUnit, increasing code coverage across critical service modules and ensuring the correctness and reliability of API logic in production environments.
- Implemented Role-Based Access Control (RBAC) to manage user permissions and restrict module access based on assigned roles, strengthening platform security and authorization management.
- Collaborated within agile development teams using Jira and Bitbucket for sprint planning, task tracking, code reviews, and version-controlled software development.

Projects

Helper Management System | MEAN Stack (MongoDB, Express, Angular, Node.js)

July 2025

- Developed a full-stack helper management system featuring CRUD operations, role-based workflows, and RESTful APIs, demonstrating end-to-end ownership across frontend and backend development.
- Integrated dynamic QR code generation to enable instant access to helper profiles through QR scanning, while implementing form-based data handling and validation for improved data accuracy.

BatBazaar | MERN Stack (MongoDB, Express, React, Node.js, Razorpay, Cloudinary, Gemini AI)

March 2025

- Built and deployed a full-stack e-commerce platform with Razorpay payment integration, real-time inventory tracking, order management, and role-based functionalities for customers and administrators.
- Integrated a Google Gemini AI-powered chatbot to provide natural language cricket bat recommendations and dynamically apply product filters through a conversational interface.
- Designed and implemented an Admin Dashboard for inventory management, stock updates, order tracking, and delivery status monitoring to streamline operational workflows.

Technical Skills

Languages: Java, Python, C, HTML/CSS, JavaScript

Frameworks/Libraries: React, Express, Angular, Node.js

Developer Tools: : Git, Jira, Bitbucket, VS Code, IntelliJ IDEA

Databases: MongoDB, SQL

Core Concepts: Data Structures & Algorithms, REST APIs, RBAC, Unit Testing, Agile Methodology

Education

Anil Neerukonda Institute of Technology And Sciences

Bachelor of Technology in CSE - 9.32 CGPA

Tagarapuvalasa, Vishakapatnam

Oct 2022 – April 2026

Sri Chaitanya Junior College

Intermediate M.P.C - 97 %

Marikavalasa, Vishakapatnam

June 2020 – May 2022

Achievements and Certifications

LeetCode: Solved 300+ problems covering data structures, algorithms

NPTEL: Programming in Java
